I was still working through my college career grad to LM1 training plan at that point. I vaguely remember the floating office/barge non-water dependent discussion but sorry I really don't remember the other lease issues. If the Exhibit B says I worked on it then I probably did but I don't recall it. I started being the "special projects" LM in late September 2004. Maybe this was one of them?

I also went to that marina a lot later on for the Ked/Sesko issues.

I looked at the file. There were no details regarding why DNR elected to claim the fill and bulkhead.

Hi All,

I read the Exhibit B Section 16 where my name and Melissa name is mentioned. I was a brand new employee with DNR, hired to manage easements. I was hired in (b) (6). As part of my training I attended a lease negotiation meeting with Mark Mauren. I remember him discussing the lease in its entirety to the tenant going over each clause. I thought at the time this was a good business practice because it seemed tenants never read their lease. I don't remember who was with me, but at that time Courtney Wasson was the land manager for Kitsap County, however Mark probably took this lease from her to do himself which is common practice in my district. The history sheet and IGBOR which I do not have a copy of would explain more, hopefully.
